AMENDMENT

Sir:

In response to the outstanding Office Action, dated October 22, 2002, having a period of response set to expire January 22, 2003, Applicants request reconsideration of the application in view of the remarks below.

In the Claims:

Please amend claim 1 as follows:

1. (Amended) A method for detecting a breast tumor, comprising the steps of:
- a) providing a probe containing a polynucleotide which comprises the sequence of SEQ ID NO:1 or a fragment thereof;
 - b) contacting said probe to a sample of tissue or tissue extract from a patient under a hybridizing condition to produce a hybridized probe; and
 - c) quantifying the level of hybridization with said probe wherein suppressed hybridization compared to control levels indicate the presence of a breast tumor.

Please add the following new claim:
